What's New in EUTCT Version 5.5?

The updates to the system are:

Controlled Term Lists:

- Anatomical Therapeutic Chemical classification system - Veterinary
- Trial Categorisation

User Functionality:

- Enhanced Dynamic Searching (Interoperability, SUC021): Multiple word Source Term Id fixed.
- CSV download timeout issue resolved.
- An additional Google-like Simple Search is available from the List Display page. This search is available for English language only and works on the entire term content as opposed to Any Name search which works on Any of the Term Name, Short Name and Other Name.

System Functionality:

- BPEL data loss: Fields 'Specific to Countries' and 'Specific to Systems' now present after approval in BPEL.

Download Controlled Term Lists:

- CSV files: Any free text data which contains commas is now enclosed (delimited) by double quotes ("value").
- Controlled Term List 'Language': In the Comma Separated Values (CSV) download file, field data 'ISO Status Code' is now present.
- CSV files: Output of both IOP and EUTCT application CSV files is now of the same encoding format.
